--	--	--	--	--	--	--	--	--

Q. B. No.

1	7	3	2	1	4
---	---	---	---	---	---

Marks : 100

Time : 120 Minutes

3TB2S

Booklet Code :

D_____
Signature of the Candidate_____
Signature of the Invigilator**INSTRUCTIONS TO THE CANDIDATE****(Read the Instructions carefully before Answering)**

1. Separate Optical Mark Reader (OMR) Answer Sheet is supplied to you along with Question Paper Booklet. Please read and follow the instructions on the OMR Answer Sheet for marking the responses and the required data.
2. The candidate should ensure that the Booklet Code printed on OMR Answer Sheet and Booklet Code supplied are same.
3. **Immediately on opening the Question Paper Booklet by tearing off the paper seal, please check for (i) The same booklet code (A/B/C/D) on each page, (ii) Serial Number of the questions (1-100), (iii) The number of pages and (iv) Correct Printing.** In case of any defect, please report to the invigilator and ask for replacement of booklet with same code within five minutes from the commencement of the test.
4. Electronic gadgets like Cell Phone, Calculator, Watches and Mathematical/Log Tables are not permitted into the examination hall.
5. **There will be $\frac{1}{4}$ negative mark for every wrong answer.** If the response to the question is left blank without answering, there will be no penalty of negative mark for that question.
6. Using Blue/Black ball point pen to darken the appropriate circles of (1), (2), (3) or (4) in the OMR Sheet corresponding to correct or the most appropriate answer to the concerned question number in the sheet. Darkening of more than one circle against any question automatically gets invalidated and will be treated as wrong answer.
7. Change of an answer is NOT allowed.
8. Rough work should be done only in the space provided in the Question Paper Booklet.
9. Return the OMR Answer Sheet and Question Paper Booklet to the invigilator before leaving the examination hall. Failure to return the OMR sheet and Question Paper Booklet is liable for criminal action.

This Booklet consists of 20 Pages for 100 Questions + 3 Pages of Rough Work + 1 Title Page i.e., Total 24 Pages.

SPACE FOR ROUGH WORK

3TB2S

2 - D

D D

5. Match the following :

List - I

- (a) Rhizopodium
- (b) Filopodium
- (c) Axopodium
- (d) Lobopodium

List - II

- (i) Diffugia
- (ii) Gromia
- (iii) Elphidium
- (iv) Actinophrys

Choose the correct answer :

- | | | | | |
|-----|------------|------------|------------|------------|
| | (a) | (b) | (c) | (d) |
| (1) | (ii) | (iv) | (iii) | (i) |
| (2) | (ii) | (iii) | (i) | (iv) |
| (3) | (iii) | (iv) | (ii) | (i) |
| (4) | (iii) | (ii) | (iv) | (i) |

6. Match the following :

List - I

- (a) Myopia
- (b) Presbyopia
- (c) Hypermetropia
- (d) Astigmatism

List - II

- (i) loss of power of accommodation of lens
- (ii) near-sightedness
- (iii) non- uniform curvature of cornea
- (iv) far-sightedness

Choose the correct answer :

- | | | | | |
|-----|------------|------------|------------|------------|
| | (a) | (b) | (c) | (d) |
| (1) | (iii) | (i) | (ii) | (iv) |
| (2) | (i) | (ii) | (iv) | (iii) |
| (3) | (ii) | (i) | (iv) | (iii) |
| (4) | (ii) | (i) | (iii) | (iv) |

7. The middle ear of a human contains three ossicles called :

- (1) External auditory meatus, tympanum, cochlea
- (2) Scala vestibuli, scala media, scala tympani
- (3) Malleus, incus, stapes
- (4) Ampulla, saccule, utricle

8. **Assertion (A):** Some Photosynthetic algae can form symbiotic associations with fungi.
Reason (R): Fungal associations with algae involve absorption of nutrients by plants.

Choose the correct answer :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A).
(2) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(3) (A) is true, but (R) is false.
(4) (A) is false, but (R) is true.
-

9. Study of fishes is called :

- (1) Ornithology (2) Herpetology
(3) Anthropology (4) Ichthyology
-

10. Five kingdom classification was given by :

- (1) R.H. Whittaker (2) Carl linnaeus (3) Carl Woese (4) Lynn Margulis
-

11. Match the following :

List - I

- (a) *Clostridium*
(b) *Aspergillus*
(c) *Monascus purpurens*
(d) *Bacillus thuringiensis*

List - II

- (i) Toxic protein
(ii) Butyric acid
(iii) Citric acid
(iv) Statins
(v) Cyclosporin - A

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|-------|-------|------|-------|
| (1) | (ii) | (iii) | (i) | (iv) |
| (2) | (iii) | (ii) | (iv) | (v) |
| (3) | (v) | (i) | (ii) | (iii) |
| (4) | (ii) | (iii) | (iv) | (i) |
-

12. DNA replication takes place in which stage of cell cycle ?

- (1) G₂ Phase (2) S Phase (3) G₁ Phase (4) M Phase
-

17. CO₂ transported in blood mainly in the form of :

- | | |
|-------------------------|-------------------------|
| (1) Dissolved in plasma | (2) Bicarbonate |
| (3) Carbonates | (4) Carbamino Compounds |
-

18. Match the following lists :

- | List - I | List - II |
|---------------|-------------------|
| (a) Mangifera | (i) Spadix |
| (b) Jasmine | (ii) Hypanthodium |
| (c) Colocasia | (iii) Cyathium |
| (d) Ficus | (iv) Receme |
| | (v) Cymule |

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|-------|-------|------|-------|
| (1) | (iii) | (v) | (i) | (iv) |
| (2) | (ii) | (iii) | (iv) | (i) |
| (3) | (i) | (ii) | (v) | (iii) |
| (4) | (iv) | (v) | (i) | (ii) |
-

19. Match the following :

- | List - I
(Species) | List - II
(Type of malaria) |
|----------------------------------|--------------------------------|
| (a) <i>Plasmodium vivax</i> | (i) mild tertian malaria |
| (b) <i>Plasmodium falciparum</i> | (ii) benign tertian malaria |
| (c) <i>Plasmodium ovale</i> | (iii) quartan malaria |
| (d) <i>Plasmodium malariae</i> | (iv) malignant tertian malaria |

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|-------|-------|------|-------|
| (1) | (i) | (ii) | (iv) | (iii) |
| (2) | (ii) | (iv) | (i) | (iii) |
| (3) | (iii) | (i) | (ii) | (iv) |
| (4) | (iv) | (iii) | (i) | (ii) |
-

20. Match the following lists :

List - I		List - II	
(a)	Lycopersicon	(i)	Family
(b)	Polemoniales	(ii)	Species
(c)	Moraceae	(iii)	Genus
(d)	Lablab	(iv)	Division
		(v)	Order

Choose the correct answer :

	(a)	(b)	(c)	(d)
(1)	(iii)	(iv)	(i)	(v)
(2)	(v)	(ii)	(iii)	(iv)
(3)	(iii)	(v)	(i)	(ii)
(4)	(iv)	(i)	(ii)	(iii)

21. Podocytes are found in :

- | | |
|------------------------------|-------------------------------|
| (1) Proximal convoluted duct | (2) Bowman's Capsule |
| (3) Ascending loop of Henley | (4) Descending loop of Henley |

22. Which of the following cell organelles contain deoxy-nucleic acid :

- (1) Chloroplast and Mitochondria
- (2) Golgi bodies and Endoplasmic reticulum
- (3) Mitochondria and Lysosome
- (4) Nucleus and Lysosome

23. **Assertion (A):** Cell cycle in eukaryotes is divided into four overlapping phases or stages; G_1 , S, G_2 and M phases.

Reason (R): The function of cell cycle is to duplicate the genome and divide it equally between two daughter cells. For this reason, it is important that the events of the cell cycle proceed in correct order, and each stage of the cell cycle is completed before the next stage commences.

Choose the correct answer :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (2) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (3) (A) is true, but (R) is false.
- (4) (A) is false, but (R) is true.

24. The theory of Biogenesis was experimentally proved by :

- | | |
|-------------------|-----------------------|
| (1) S.A. Waksman | (2) Alexander Fleming |
| (3) Edward Jenner | (4) Louis Pasteur |
-

25. Match the following cell types with their corresponding secretions :

Cell type	Secretions
(a) Goblet cells	(i) Pepsinogen
(b) Chief cells	(ii) HCl
(c) Oxyntic cells	(iii) Mucus
(d) Beta cells	(iv) Insulin

Choose the **correct** answer :

- | | (a) | (b) | (c) | (d) |
|-----|-------|------|-------|------|
| (1) | (i) | (ii) | (iii) | (iv) |
| (2) | (iii) | (ii) | (i) | (iv) |
| (3) | (iii) | (ii) | (iv) | (i) |
| (4) | (iii) | (i) | (ii) | (iv) |
-

26. Fleshy flattened and fleshy cylindrical stem modifications are seen respectively in :

- | | |
|---------------------------|-----------------------------|
| (1) Opuntia and Asparagus | (2) Asparagus and Euphorbia |
| (3) Opuntia and Euphorbia | (4) Euphorbia and Asparagus |
-

27. Suberin occurs in association with :

- | | |
|---|--|
| (1) cellulose in cork cells of endoderm | (2) hemicellulose in cork cells of protoderm |
| (3) cellulose in cork cells of the periderm | (4) pectin in cork cells of the endoderm |
-

28. Which one of the following photosynthetic pigments is **not** an accessory pigment ?

- | | |
|-------------------|-------------------|
| (1) Chlorophyll b | (2) Xanthophylls |
| (3) Carotenoids | (4) Chlorophyll a |
-

29. Which one is total root parasite ?

- | | | | |
|----------------------|---------------------|----------------------|-------------------------|
| (1) <i>Loranthus</i> | (2) <i>Santalum</i> | (3) <i>Orobancha</i> | (4) <i>Viscum album</i> |
|----------------------|---------------------|----------------------|-------------------------|
-

30. **Assertion (A):** The immediate cause of opening or closing of the stomata is a change in the turgidity of the guard cells.

Reason (R): Thin and elastic inner wall of guard cells and longitudinal orientation of cellulose microfibrils in the cell wall of the guard cells aid in stomatal opening and closing.

Choose the correct answer :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (2) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (3) (A) is true, but (R) is false.
 - (4) (A) is false, but (R) is true.
-

31. **Assertion (A):** Inactive Bt Prototoxin becomes active form of toxin in the insect gut.

Reason (R): Acidic pH of the Insect-gut solubilises and thus activates Bt toxin.

Choose the correct answer :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (2) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (3) (A) is true, but (R) is false.
 - (4) (A) is false, but (R) is true.
-

32. The events during erythrocytic cycle of plasmodium are given below :

- | | | |
|--------------------------|-------------------|-----------------|
| (a) gametocyte formation | (b) ameboid stage | (c) trophozoite |
| (d) signet ring stage | (e) shizont stage | |

The correct order of sequence is :

- | | |
|---------------------------------|---------------------------------|
| (1) (c) - (d) - (e) - (b) - (a) | (2) (d) - (c) - (e) - (a) - (b) |
| (3) (c) - (d) - (b) - (e) - (a) | (4) (a) - (b) - (c) - (e) - (d) |
-

33. Match the following :

List - I	List - II
(a) epipetalous	(i) citrus
(b) polyadelphous	(ii) brinjal
(c) epiphyllous	(iii) china rose
(d) monoadelphous	(iv) lily
	(v) pea

Choose the correct answer :

	(a)	(b)	(c)	(d)
(1)	(ii)	(iv)	(i)	(iii)
(2)	(v)	(ii)	(iii)	(iv)
(3)	(iv)	(iii)	(v)	(i)
(4)	(ii)	(i)	(iv)	(iii)

34. Match the following :

List - I	List - II
(a) Holozoic	(i) <i>Trypanasoma</i>
(b) Parasitic	(ii) <i>Rhincomonas</i>
(c) Coprozoic	(iii) <i>Amoeba</i>
(d) Holophytic	(iv) <i>Euglena</i>

Choose the correct answer :

	(a)	(b)	(c)	(d)
(1)	(iii)	(ii)	(i)	(iv)
(2)	(iv)	(ii)	(iii)	(i)
(3)	(ii)	(iii)	(iv)	(i)
(4)	(iii)	(i)	(ii)	(iv)

35. Which one of the following insectivorous plant use its modified leaves to trap insects for their nitrogen requirement ?

- (1) Cacti (2) Acacia (3) Nerium (4) Dionea

36. Glycolytic reaction catalyzed by which of the following enzyme results in the formation of ATP ?

- (1) Hexokinase (2) G-3-P dehydrogenase
 (3) Phosphoglycerokinase (4) Enolase

37. Match the following :

List - I (Crop variety)	List - II (Resistance to disease)
(a) Wheat (Himagiri)	(i) Bacterial blight
(b) Brassica (Pusa swarnim)	(ii) Leaf and stripe rust
(c) Cowpea (Pusa komal)	(iii) Tobacco mosaic virus and leaf curl
(d) Chilli (Pusa sadabahar)	(iv) White rust
	(v) Black rot

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|-------|-------|------|-------|
| (1) | (ii) | (i) | (iv) | (v) |
| (2) | (ii) | (iv) | (i) | (iii) |
| (3) | (iii) | (ii) | (v) | (i) |
| (4) | (i) | (iii) | (ii) | (iv) |

38. The structure of the sporozoite of *plasmodium vivax* was studied by :

- | | |
|---------------------|-------------------|
| (1) Ernst Haeckel | (2) Garnham |
| (3) Sir Ronald Ross | (4) Camillo Golgi |

39. **Assertion (A):** Photophosphorylation is the synthesis of ATP from ADP and inorganic phosphate due to a light driven electron transport.

Reason (R): The terminal electron acceptor in respiratory electron transport is oxygen.

Choose the correct answer :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (2) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (3) (A) is true, but (R) is false.
- (4) (A) is false but (R) is true

40. In amniocentesis amniotic fluid is collected for the diagnosis of :

- | | |
|---------------------------------|-------------------------------|
| (1) Viral infection | (2) Bacterial infection |
| (3) Physiological abnormalities | (4) Chromosomal abnormalities |

41. Hirudinaria (Leech) contains x pairs of testes and y pairs of nephridia.

- | | | | |
|----------------------|--------------------|----------------------|----------------------|
| (1) $x - 14; y - 19$ | (2) $x - 5; y - 2$ | (3) $x - 11; y - 17$ | (4) $x - 10; y - 13$ |
|----------------------|--------------------|----------------------|----------------------|

42. The following national act provided legal framework on 'Induced abortion' :

- (1) Medical Termination of Foetus Act (MTFA), 1990.
 - (2) Medical Termination of Pregnancy Act, 1964.
 - (3) Medical Termination of Pregnancy Act, 1971.
 - (4) Medical Pregnancy Act, 1974.
-

43. Match the following :

List - I

- (a) Mycoplasmas
- (b) Actinomycetes
- (c) Kieselguhr
- (d) Noctiluca

List - II

- (i) mycolic acid
- (ii) diatoms
- (iii) lack cell wall
- (iv) cytopharynx
- (v) bioluminescence

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|-------|-------|------|-------|
| (1) | (iii) | (i) | (ii) | (v) |
| (2) | (iii) | (ii) | (i) | (iv) |
| (3) | (i) | (iii) | (iv) | (v) |
| (4) | (v) | (iv) | (ii) | (iii) |
-

44. How many floating ribs are found in human ?

- (1) Three pairs (2) Two pairs (3) One pair (4) Four pairs
-

45. Each haemoglobin molecule can carry a maximum of how many molecules of oxygen ?

- (1) 2 (2) 3 (3) 4 (4) 1
-

46. Maximum absorption of the end products of digestion occurs in :

- (1) Duodenum (2) Stomach (3) Small Intestine (4) Large Intestine
-

47. Correct order of layers (from outer to inner) present in transverse section of gut is :

- (1) Muscularis, Serosa, Sub-mucosa, Mucosa
 - (2) Serosa, Muscularis, Mucosa, Sub-mucosa
 - (3) Serosa, Muscularis, Sub-mucosa, Mucosa
 - (4) Mucosa, Sub-mucosa, Muscularis, Serosa
-

48. Which of the following statement is **false** regarding proteins and their function ?

- (1) GLUT - 4 enables glucose transport into cells
 - (2) Collagen forms intercellular ground substance
 - (3) Trypsin is an enzyme
 - (4) All proteins are enzymes
-

49. Function of the nucleolus is :

- (1) DNA synthesis
 - (2) ATP synthesis
 - (3) t-RNA synthesis
 - (4) Assembly of ribosomes
-

50. The **correct** order of sub stages of Prophase - I of meiosis are :

- (1) Leptotene, Zygotene, Diakinesis, Diplotene, Pachytene
 - (2) Leptotene, Diplotene, Zygotene, Pachytene, Diakinesis
 - (3) Leptotene, Zygotene, Pachytene, Diplotene, Diakinesis
 - (4) Leptotene, Zygotene, Pachytene, Diakinesis, Diplotene
-

51. The following is an autosomal recessive genetic disorder results due to mutation affecting a gene in the long arm of chromosome 7 :

- (1) Sickle-cell-anaemia
 - (2) Haemophilia
 - (3) Cystic fibrosis
 - (4) Leukemia
-

52. The presence of immunogenic D antigen indicates the following condition :

- (1) 'A' blood group
 - (2) 'B' blood group
 - (3) 'Rh' positive
 - (4) 'ABO' blood group
-

53. The phenomenon of multiple expression of a single gene is called :

- (1) Sex index
 - (2) Polymorphism
 - (3) Pleiotropy
 - (4) Sex linked gene
-

59. World Health Organization is located in :

- (1) New Delhi (2) Geneva (3) New York (4) London
-

60. Match the following :

List - I		List - II	
(a) MRI		(i) Is a non invasive procedure for recording electrical changes in the heart.	
(b) ECG		(ii) A process of producing a two dimensional slice through a 3 - dimension object.	
(c) EEG		(iii) Uses Magnetism, Radio waves and a Computer to produce images of body components.	
(d) CT Scan		(iv) A process of recording the electrical activity of the brain.	

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|------------|------------|------------|------------|
| (1) | (i) | (iii) | (iv) | (ii) |
| (2) | (iv) | (ii) | (iii) | (i) |
| (3) | (iii) | (i) | (iv) | (ii) |
| (4) | (ii) | (iv) | (i) | (iii) |
-

61. Match the following national parks with their corresponding protected species :

List - I		List - II	
National Parks		Protected Animals	
(a) Dachigam National Park		(i) Birds	
(b) Keoladeo National Park		(ii) Kashmir Stag	
(c) Rajaji National Park		(iii) Asiatic Lion	
(d) Gir Forest National Park		(iv) Asian Elephant	

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|------------|------------|------------|------------|
| (1) | (ii) | (i) | (iv) | (iii) |
| (2) | (iv) | (i) | (ii) | (iii) |
| (3) | (iii) | (ii) | (iv) | (i) |
| (4) | (ii) | (i) | (iii) | (iv) |
-

62. Different structures evolving for the same function and hence having similarity is known as :

- (1) Biological Evolution (2) Convergent Evolution
 (3) Divergent Evolution (4) Adaptive Radiation
-

63. The following pump plays an important role in the opening and closing of stomata :

- | | |
|-----------------------------------|--------------------|
| (1) Sodium pump | (2) Potassium pump |
| (3) Na^+/K^+ pump | (4) Proton pump |
-

64. The vaccines against Diphtheria and tetanus are :

- | | |
|--------------------------------------|--------------------|
| (1) Attenuated whole agent vaccines | (2) Serum vaccines |
| (3) Inactivated whole agent vaccines | (4) Toxoids |
-

65. Match the following :

- | List - I | List - II |
|-----------------|---|
| (a) Totipotent | (i) differentiate into nearly all types of cells |
| (b) Pluripotent | (ii) can produce only one cell type, their own |
| (c) Multipotent | (iii) construct a complete viable organism |
| (d) Unipotent | (iv) can differentiate into a number of types of cells of closely related family of cells |

Choose the correct answer :

- | | (a) | (b) | (c) | (d) |
|-----|-------|------|-------|-------|
| (1) | (iv) | (ii) | (iii) | (i) |
| (2) | (i) | (iv) | (ii) | (iii) |
| (3) | (iii) | (i) | (iv) | (ii) |
| (4) | (ii) | (i) | (iii) | (iv) |
-

66. "While the general type of vegetation is not related to temperature, the type of flora of a particular region is determined by it."

This law is called as :

- | | |
|---------------------------|--------------------------|
| (1) Liebig's law | (2) Schimper's first law |
| (3) Law of thermal energy | (4) Law of sciophytes |
-

67. Enzyme - Linked Immunosorbent Assay (ELISA) is a biochemical procedure to detect :

- | | |
|----------------|------------------|
| (1) Cancer | (2) Genes |
| (3) Antibodies | (4) Blood groups |
-

68. The following Honey bees are widely used in bee keeping in India :

- | | |
|-------------------------------|------------------------------|
| (1) <i>Musca domestica</i> | (2) <i>Blatta orientalis</i> |
| (3) <i>Apis cerana indica</i> | (4) <i>Prolixus Rhodnius</i> |
-

69. Read the following statements :

- (a) They occur from time to time in naturally breeding populations
- (b) They are discontinuous and are not accumulated over generations
- (c) They are full fledged and so there are no intermediate forms
- (d) They are subjected to natural selection

Which one of the following theories is better explained by the salient features given above ?

- (1) Theory of Heridily
 - (2) Mutation Theory
 - (3) Darwin's Theory
 - (4) Lamarck's Theory
-

70. Minamata disease occurred at Minamata Bay on the coast of Kyushu, an island of Japan. This disease is caused due to :

- (1) Cadmium
 - (2) Copper
 - (3) Mercury
 - (4) Lead
-

71. A principle stating that the allelic frequencies in a population will remain constant from generation to generation under certain set conditions, is called :

- (1) Natural selection
 - (2) Gene flow
 - (3) Hardy - Weinberg equilibrium
 - (4) Genetic load
-

72. Sudden appearance of some vestigial organs in a better developed condition is called :

- (1) Analogous organs
 - (2) Connecting link
 - (3) Atavism
 - (4) Homologous organs
-

73. The blood types are inherited by the interaction of three autosomal alleles of the gene located on :

- (1) Chromosome 18
 - (2) Chromosome 9
 - (3) Chromosome 7
 - (4) Chromosome 12
-

74. Greenhouse effect is responsible for heating the earth's surface and atmosphere. The greenhouse effect is due to the following gases :

- (1) Carbon oxides, Sulphur oxides, Nitrous oxides
 - (2) Carbon dioxide, Methane, CFCs
 - (3) Sulphur dioxide, Carbon dioxide, Nitrous oxides
 - (4) Nitrous oxide, Methane, Sulphur oxides
-

75. The National Forest Policy (1988) of India has recommended the following forest cover for the plains and for the hills respectively :

- | | |
|-----------------------|-----------------------|
| (1) 50 and 50 percent | (2) 33 and 67 percent |
| (3) 30 and 70 percent | (4) 40 and 60 percent |
-

76. Identify the **correct** sequence of DNA fingerprinting :

- (a) Obtaining and fragmenting DNA
- (b) Using probes to identify specific DNA
- (c) Separation of DNA fragments by electrophoresis
- (d) Hybridization with probes
- (e) Denaturing DNA and blotting
- (f) Exposure on film to make a DNA fingerprint

- | | |
|---------------------------------------|---------------------------------------|
| (1) (b) → (a) → (c) → (d) → (e) → (f) | (2) (a) → (c) → (e) → (b) → (d) → (f) |
| (3) (e) → (a) → (b) → (c) → (d) → (f) | (4) (a) → (b) → (c) → (e) → (d) → (f) |
-

77. The first transgenic Cow, Rosie produced the following :

- | | |
|--------------------------------|----------------------------------|
| (1) Human alpha - lactalbumin | (2) Insulin - like growth factor |
| (3) α - 1 - antitrypsin | (4) Insulin |
-

78. The existence of deleterious genes within the population is called :

- | | | | |
|-------------------|-------------------|------------------|---------------|
| (1) Gene mutation | (2) Genetic Drift | (3) Genetic Load | (4) Gene Flow |
|-------------------|-------------------|------------------|---------------|
-

79. Identify the **correct** sequence of the stages of human evolution :

- (1) Dryopithecus → Australopithecus → Homohabilis → Homoerectus → Homoneanderthalensis → Homosapiens
 - (2) Homohabilis → Dryopithicus → Homoneanderthalensis → Australopithecus → Homohabilis → Homosapiens
 - (3) Homoneanderathalensis → Dryopithecus → Australopithecus → Homoerectus → Homohabilis → Homosapiens
 - (4) Australopithecus → Dryopithicus → Homoerectus → Homohabilis → Homoneanderthalensis → Homosapiens
-

80. The change in the frequency of gene that occurs merely by chance and not by selection in small population is called :

- (1) Speciation (2) Genetic drift (3) Genetic load (4) Gene flow
-

81. A diet high in saturated fats can be linked to which of the following ?

- (1) Muscular dystrophy (2) Bulimia
(3) Anorexia (4) Cardiovascular disease
-

82. The first clinical gene therapy was given in 1990 to a four year girl with the following deficiency :

- (1) Phenylalanine hydroxylase (2) Adenosine deaminase
(3) Homogentisate - 1, 2 - dioxygenase (4) Tyrosine - 3 - mono oxygenase
-

83. The sickle - cell anaemia, an autosomal recessive genetic blood disorder, is controlled by a single pair of alleles, Hb^A and Hb^s found on :

- (1) Chromosome 12 (2) Chromosome 7
(3) Chromosome 11 (4) Chromosome 16
-

84. Excessive degradation of red blood cells due to formation of abnormal haemoglobin molecules, because of the defects caused by genetic mutations, will result in :

- (1) Edwards syndrome (2) Klinefelter's syndrome
(3) Colour blindness (4) Thalassemia
-

85. Pap Smear test is done to detect the following cancer :

- (1) Prostate cancer (2) Blood cancer
(3) Cervical cancer (4) Breast cancer
-

86. A zone of junction or a transition area between two diverse communities where these communities integrate is known as :

- (1) Community Dynamics (2) Ecotone
(3) Ecological Niche (4) Ecological Succession
-

87. Bird flu disease is caused by :

- (1) H₅N₁ (2) H₂N₁ (3) N₁H₃ (4) N₁H₄
-

88. Snake venom contains all the following except :

- | | |
|-------------------------|--------------------|
| (1) Disintegrins | (2) Toxic proteins |
| (3) Toxic carbohydrates | (4) Sarafotoxins |
-

89. In the process of destruction of ozone, the following atom functions as a catalyst :

- | | | | |
|-----------------|-------------------|-----------------|-------------------|
| (1) Oxygen atom | (2) Chlorine atom | (3) Carbon atom | (4) Hydrogen atom |
|-----------------|-------------------|-----------------|-------------------|
-

90. The presence of excess nutrients in ponds and lakes create a situation of excess growth of algae causing algal blooms on the surface of the water. This situation is known as :

- | | |
|----------------------|---------------------------|
| (1) Ecological Niche | (2) Edge effect |
| (3) Eutrophication | (4) Ecological Succession |
-

91. The lens of the eye held in position by :

- | | |
|------------------------------|------------------------------|
| (1) Inferior oblique muscles | (2) Superior oblique muscles |
| (3) Suspensory ligaments | (4) Medial rectus muscles |
-

92. The golden age of reptiles in the geological time scale is :

- | | | | |
|-------------------|--------------------|------------------|---------------------|
| (1) Coenozoic era | (2) Palaeozoic era | (3) Mesozoic era | (4) Precambrian era |
|-------------------|--------------------|------------------|---------------------|
-

93. Organs of Corti is situated in :

- | | |
|-------------------------|------------------------|
| (1) Reissner's membrane | (2) Scala tympani |
| (3) Basilar membrane | (4) Tectorial membrane |
-

94. Aquatic ecosystems are divided as fresh water and marine ecosystems. The lentic ecosystem represents the following :

- | | | | |
|-----------|------------|----------|-------------|
| (1) Ocean | (2) Spring | (3) Lake | (4) Estuary |
|-----------|------------|----------|-------------|
